# SEARCH PORTALS FOR YOUR CONTENT MANAGEMENT NEEDS

**Harness the expansive power of the Veladocs Search Portal**, transforming traditional document management into a streamlined, cloud-powered solution. Designed to provide a seamless transition from legacy ECM systems to modern, flexible solutions, the Veladocs Search Portal by Docuvela empowers your organization to manage documents with unparalleled ease and reliability.

## Access and Efficiency

A Search Portal allows users to quickly find and retrieve documents without navigating complex ECM interfaces, significantly boosting productivity.

By offloading view-only access, the primary ECM system's performance improves, ensuring smoother operations and better resource management.

## Cost Savings

Implementing a Search Portal reduces licensing costs by limiting access to the primary ECM repository, allowing for more effective resource allocation.

Additionally, it enables secure external access for third-party users, enhancing collaboration without compromising system security.

## Risk Reduction

A Search Portal minimizes reliance on outdated ECM platforms, helping future-proof your operations and reduce risks associated with obsolete technology.

It also ensures high availability of documents, maintaining access even during ECM outages or maintenance, which is crucial for business continuity and reliability.

# SEARCH PORTALS FOR YOUR CONTENT MANAGEMENT NEEDS

## What is a Search Portal?

A Search Portal is a secure, read-only interface that provides streamlined access to your documents and metadata stored in legacy ECM systems. It functions by creating a cache of your documents in a cloud-based environment, allowing users to search, retrieve, and view content without altering the original data. This solution ensures that your valuable information is easily accessible while maintaining its integrity and security.

## Key Benefits of a Veladocs Search Portal

### Tailored to Specific Needs

Designed to meet the specific needs of your business. We work closely with you to understand your requirements and create a solution that perfectly aligns with your goals.

### User Centric

Lightweight and efficient, promoting ease of use without sacrificing functionality. Our user-friendly design makes it easy for your team to adopt and utilize the system effectively whether on desktop or mobile.

### Flexible Integrations

Seamlessly integrates with multiple existing ECM systems including Alfresco, Nuxeo, Opentext Documentum, FileNet and more. The Veladocs Search Portal from Docuvela enhances your current operations without disrupting them.

### Cost Savings

Optimize your licensing strategy and reduce expenses with solutions tailored to your needs. By focusing on what you truly need, we help you avoid unnecessary costs and improve your return on investment.

### Cloud Native Architecture

Built by Docuvela on AWS S3 for unmatched security, reliability, and scalability. This ensures that your document management system can grow with your business, adapting to increasing demands.

### Improved Performance

Enhance the primary ECM system's performance by offloading search and view tasks. This leads to a more responsive and efficient system, improving overall user experience and operational efficiency.
